MESSAGE
FROM THE YOGYAKARTA STATE UNIVERSITY RECTOR

Welcome to Yogyakarta, Indonesia!
His Excellency Director General of Higher Education of Education and Culture Ministry
Honourable Heads of Institutes of Research of the surrounding universities
Vice Rectors and Deans of all faculties
Distinguished all invited speakers and all other speakers
Distinguished guests
All participants
Ladies and gentlemen
Assalamu'alaikum warrahmatullah wabarakatuh
May peace and God’s blessings be upon you all
A very good morning

On behalf of Yogyakarta State University and the committee, let me first of all extend to you all my warmest and heartfelt welcome to the 2nd International Conference on Educational Research and Innovation, held in Yogyakarta, one of the most historic and cultural cities in Indonesia, and, also, the city of education.

It is indeed a privilege for Yogyakarta State University to have the opportunity to organise this very important conference in which educational researchers and practitioners get together to share ideas, experiences, expectations, and research findings. This conference is held as one of the agendas of Yogyakarta State University to celebrate its 50th anniversary. The theme of this year’s conference is Enhancing Educational Research for Developing a Person of Character.

Distinguished Guests, Ladies and Gentlemen
Research is one of the three activities that has to be done by the academic members of the university. The lecturers’ research activity is a systematic effort to solve the problems or answer the questions by collecting data, formulating the generalities based on the data, then finding and developing organized knowledge by scientific method. Through research activities, it is expected to get valuable empirical facts to improve and develop the theory and practice to bring a better quality of education.

In connection with the essence of educational research that has been conducted to improve the quality of education, it is suggested that the research process should be done through a systematic process to get the knowledge and to solve the educational problems by using a scientific method, from the process of collecting data and its analysis up to the
stage of formulating the generalization based on the data interpretation. So, the research has a quality that is scientifically approved.

Another important effort is by updating the knowledge and insights in the educational field either through reading related references or having discussions and meetings with other researchers and educational practitioners. In this context an international conference on educational researches and innovations constitutes a strategic forum to improve the researchers’ insights and studies in contributing themselves to solve the educational problems through researches.

I do hope that in the next conferences the coverage of the research areas also includes education in all fields, including education for professions, not only education in the school level.

Distinguished Guests, Ladies and Gentlemen

This conference will not have been what it is without the support from various parties. In this opportunity let me extend my sincere thanks and highest appreciation, especially the Head of the Research Centre and Community Service, the Chairperson of the Anniversary of Yogyakarta State University and the whole conference committee members. We have done our best to make this conference a big success. However, should you find any shortcomings and inconveniences, please accept my apologies.

To conclude, let me wish you a fruitful discussion during the conference and an enjoyable stay in Yogyakarta. And finally, hopefully all materials in this conference compiled into a proceeding that all related parties can read are useful for us to improve the quality of education.

Thank you very much for your attention.

Wassalamu’alaikum warrahatullah wabarakatuh.
May peace and God’s blessings be upon you all

Yogyakarta, 7 May 2014
Rector,

Prof. Dr. Rochmat Wahab, M.Pd., M.A.
MESSAGE
BY THE CHAIR OF THE CONFERENCE

His Excellency Director General of Higher Education of Education and Culture Ministry
Honorable Rector of Yogyakarta State University
Vice Rectors and Deans of all faculties
Honourable Heads of Institute of Research of the surrounding universities
Distinguished all invited speakers and all other speakers
Distinguished guests
All participants
Ladies and gentlemen
Assalamu’alaikum warrahmatullah wabarakatuh
May peace and God’s blessings be upon you all
Good morning

On behalf of the committee, allow me to extend my warmest greetings and welcome to the 2nd International Conference on Educational Research and Innovation, held by Yogyakarta State to celebrate its 50th anniversary.

Raising the theme – Enhancing Educational Research to Develop a Person of Character – this conference is designed to develop the educational sciences and policies, innovations in the research methods, and doing some network among institutions focuses the discussions on the four pillars of education - class dynamics, teacher training, student learning, and teaching method.

Education should make humans better and wiser. They should be able apply their knowledge for a good life in every aspect of the society. An educational system can be considered successful if it can develop the human character which is needed to gain respect for this nation.

To achieve that, people are expected to help one another to improve the quality of education in this country. Hopefully, all discussions in this conference can be inspiring and useful for us to improve the quality of education.

Ladies and gentlemen

For your information, we will proudly present one keynote speech, four plenary presentation sessions and five parallel presentation sessions. Four outstanding speakers in the field of educational research have been invited. They are Professor Dato’ Dr Ibrahim Ahmad Bajunid from INTI-Laureate International Universities, Malaysia, Dr. Elizabeth Hartnell-Young from Australian Council of Educational Research, Prof. Darmiyati Zuchdi, Ed. D from Yogyakarta State University, and Dr. Seloamoney Palaniandy from Infrastructure University of Kuala Lumpur, Malaysia.

Ladies and gentlemen
We have done our best to prepare for this conference. So, my highest appreciation and heartfelt thanks to all committee members. As to err is human, shortcomings may occur here and there. On behalf of the committee, I would therefore like you all to accept our apologies.

To conclude, let me wish you a productive discussion and a fruitful conference. Thank you very much for your attention.

Wassalamu’alaikum warrahmatullah wabarakatuh.
May peace and God’s blessings be upon you all

Yogyakarta, 7 May 2014
Head of Research Institute and Community Service of Yogyakarta State University

Prof. Dr. Anik Ghufron, M.Pd.
